STEP BY STEP TO WIN

湖北维京科技有限公司
HuBei Viking Technology Co., Ltd

C公司简介 Company profile

湖北维京科技有限公司成立于2015年12月，注册资金3000万，占地面积65亩。位于鄂州经济技术开发区共青港路与英豪大道交汇东北处，主要从事超细玻璃纤维隔板研发、生产及销售，拥有各类高、中技术人员多名，并通过了ISO9000质量管理体系认证。现有国内先进隔板生产线多条，年产AGM隔板约4000吨。拥有国内先进的控制设备、工艺、检验技术；公司引进现代管理手段，对主要生产和检验环节实行微电脑全程监控。所有的产品均按照客户要求定制生产，以客户满意为品质标准。

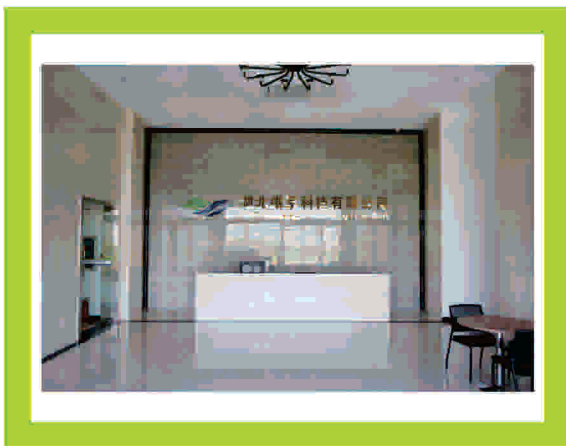

本公司依据ISO9001：2015标准全过程控制质量管理行为，以“务实严谨，质量第一”为管理理念，坚持高起点重管理，以技术为保障，以质量求发展，采用先进的生产工艺、质量保证的原材料和不断完善的管理体系，确保出厂产品质量的稳定可靠。公司确定了“以顾客满意为核心，科学管理、积极创新、准时高效、持续改进。确保产品质量和流程的准确。快速反应、满足并超越顾客要求。”的质量方针，郑重承诺“五个最”，即：最优的产品，最满意的交货期，最好的服务，最高效的协作精神，最严的品质管理。以此加强合作，共寻发展。

公司诚挚为各届新老客户服务，愿成为助您事业成功的亲密伙伴，携手并进，共创辉煌。

Hubei Viking Technology Co., Ltd. was established in December 2015 with a registered capital of 30 million and covers an area of 65 acres in the northeast of the intersection of Gongqinggang Road and Yinghao Avenue in the Ezhou Economic and Technological Development Zone. It is mainly engaged in the research and development, production and sale of ultrafine fiber partition which has passed the ISO9000 quality management system. It has a variety of high and medium-skilled employees and many advanced partition production lines with an annual output of about 4,000 tons of AGM partitions. Besides the domestic advanced control equipment, process and inspection technology, we also introduced modern management technique to achieve the microcomputer monitoring in the key procedure of production and inspection. Customer satisfaction is our quality standard, so all our products are customized.

In accordance with the ISO 9001: 2015 standard, the company performs quality management throughout the process. With the concept of "Be pragmatic and rigorous, never forget quality first", we insist on high starting point and focus in management, support ourselves with high technology, and pursue development with high quality. We guarantee the stability and reliability of product quality by adopting advanced production technology, using qualified material and continuously improving management system. The company confirms the quality policy of meeting customer requirements, ensuring product quality and process accuracy with scientific management, positive innovation, punctuality, efficiency and continuous improvement. Respond, meet and exceed customer requirements quickly. We solemnly promise you the "five bests" which are the best product, the best delivery period, the best service, the best collaboration and the best quality management to strengthen cooperation and seek common development.

We sincerely serve our new and old customer. We are willing to help your business as a close partner, to create mutual progress and mutual glory.

质量是立足之本 创新是发展之魂
Quality is our foundation and innovation
is the soul of development

品质源于专业 科技创造价值
Quality comes from profession and
technology creates value.

C 企业文化 - corporate culture

企业宗旨

Corporate purpose

以满足顾客需求为目标，以市场求生存，以质量求发展

To meet customer needs as our goal, to survive in suiting market and to develop with our quality

企业信念

Business beliefs

我们不仅生产和销售商品，也在创造和推广文化

We not only produce and sell goods, but also create and promote culture

企业精神

Enterprise spirit

只寻理由去成功，不为失败找借口

Find reasons to succeed, not excuses for failure

企业人才

Enterprise talent

视人为根本，视员工为财富

See people as fundamental, employees as wealth

企业团体

Corporate groups

真诚、理解、合作、进取

Sincere, understanding, cooperative, enterprising

企业管理

Business management

提高人员素质，提倡自我管理

Improving personnel quality and promoting self-management

企业制胜之道

Enterprise wins

积极沟通-真诚共处-彼此支持-互信互勉

开放胸襟-互相包容-同担责任-共享成果

Positive Communication-Sincere Coexistence-Mutual Support-Mutual Trust and Encouragement

Open mind-mutual inclusion-shared responsibility-shared results

高瞻远瞩

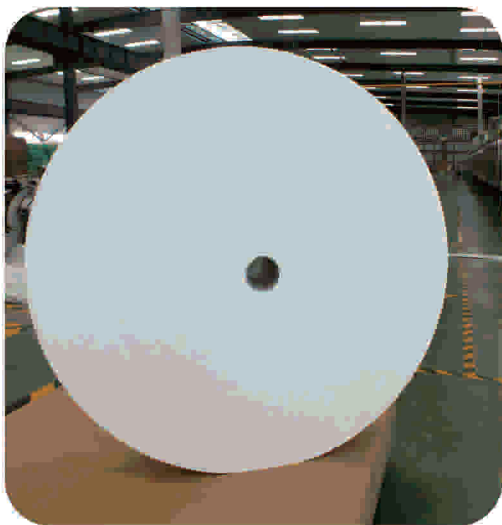

LOOK FAR AHEAD AND
AIM HIGH

建立在追求利润之
上的核心理念是成就高瞻远瞩公司的基石。

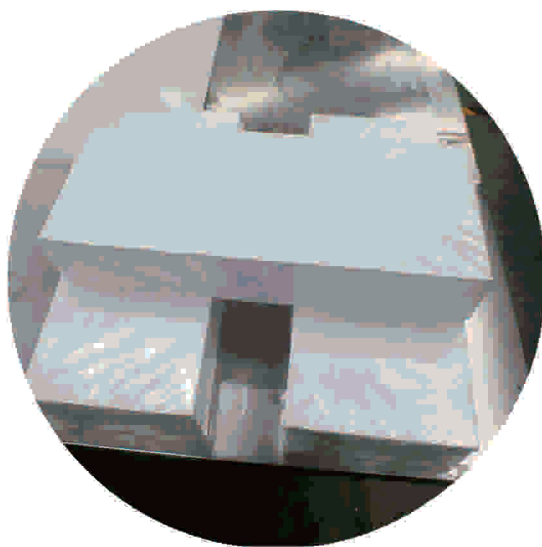

03 生产流程 | Production Process

高达93%孔率的多孔材料，
能高效储存电池电解液。

porous material up to 93%
porosity can effectively storage
battery electrolyte.

用途：UPS电源、电力系统、铁路系统、通讯设备、应急灯、防火和警卫系统、发动机、电力车和摩托车、密封式电源、太阳能、风能。

Applications:UPS power supply, power system, railway system,communication equipment, emergency light, fireproofing and alarm system, engine, electric vehicle and motorcycle, sealed power supply, solar and wind power system.

阀控式密封铅酸蓄电池玻璃纤维隔板 (AGM隔板)

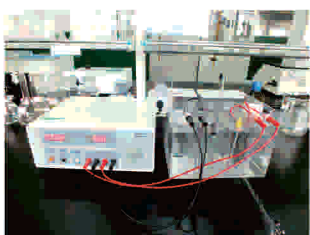

AGM Partition Of Valve Regulated Lead-acid Batteries

AGM隔板是以直径0.4 ~ 3um超细玻璃纤维经湿法制成的无毒、无味、洁白的产品，是阀控式密封铅酸蓄电池(简称VRLA电池)的专用核心材料。

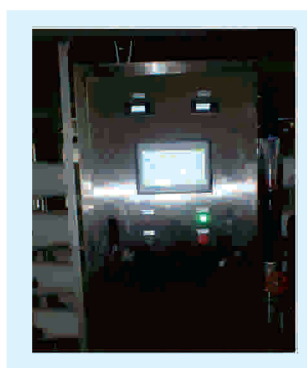

AGM隔板的优良性能表现在:耐酸侵蚀好，厚度均匀，高孔隙率，吸收电解液快，纵横向均有好的抗张强度，较好的压缩性能保证了一定的极群压力，良好的绝缘性能等等。AGM隔板在电池中主要起到固定电解液，提供充放电中两极生产的氢氧复合的通道，阻碍两极活性物质脱落，减铅枝晶的生成，减少电解液在充放电过程中的损失，使VRLA电池达到免维护或少维护的目的，延长电池的使用寿命。

AGM partition is made of microfiber with a diameter of 0.4 to 3um by wet process. It is a nonpoisonous, tasteless and clean product used as core material in VRLA battery.

It has excellent performances of corrosion resistance, even thickness, high porosity, vertical and horizontal tensile strength, insulativity and fast absorption of electrolyte. It also has fine compressibility to confirm polar pressure. AGM partition is mainly used to maintain electrolyte, provide pass for hydrogen and oxygen composite generated by charging and discharging, prevent active substrate in poles from abscission, slow down the generation of lead dendrite, reduce the electrolyte loss in charging and discharging. It can prolong battery life by reducing or even avoiding maintenance.

06 生产设备 | Workshop Equipment

地址：湖北省鄂州市经济开发区共青港路东段

ADD: Ezhou Economic Development Zone, Hubei Province Eastern section of Gongqing Port Road
